

CENTURY DESIGN INC.

CE COMPLIANT

CD-6090 UNIVERSAL ROUTER

FROM CONCEPT TO COMPLETION

Highlights

- The Universal Routing Machine is used as a multi-purpose duplication machine for a wide range of parts.
- Overhead router/follower assembly is manually operated and rides on linear ball bushings in both axes.
- Parts are held in air operated vises (4 vises for parts and 4 vises for masters) with holding power of 15 times the air pressure used.
- Vises have capacity to hold parts up to 4 inches wide.
- Splash shield incorporated to protect the precision longitudinal ball rails.
- Table is capable of tilting 45° in both directions, by means of hand wheel. Table lock are provided at each end of table.
