

CENTURY DESIGN INC.

High Output

M-2000 Centerless Sander

FROM CONCEPT TO COMPLETION

Highlights

- ◆ Taper sensing feature provides uniform stock removal over entire length of blank regardless of diameter.
- ◆ All parts subject to corrosion, are brass, stainless steel, aluminum or cadmium-plated steel.
- ◆ Produces stronger, more uniform blanks ready for painting.
- ◆ Variable speed inverter driven system for repeatable accuracies.
- ◆ Controlled material removed by simple control panel adjustment.
- ◆ Pneumatic belt tensioner for longer belt and smoother finishes.
- ◆ Instant belt alignment for perfect tracking.
- ◆ Low flow water system for dust-free sanding.
- ◆ 2 inch diameter standard with 4 inch diameter capability with simple adjustment.
- ◆ Production rate: approximately 1 foot per second.
- ◆ Compatible with CDI's complete line of automated feed systems requiring no dedicated operator .
