OPTIONS :

- **Grip-Tite Pneumatic 3-Jaw Chuck.** This quick-acting power chuck eliminates time-consuming collet changes and manual chucking, operations that slow down production. It will accommodate part diameters from 3/16" to 1 3/16". The high-gripping power will increase the utility of your machine and increase your production rates at the same time.
- **Accu-Tension System.** You can measure the tape tension as the tape is wrapped on your parts. It will also automatically control the tension to ensure part-to-part consistency.

Highlights

Specially designed to wrap a wide range of parts from small diameter parts and parts that can benefit from variable overlap wrapping techniques.

- ◆ Servo driven—2 axes of control
- ◆ Wrap in either, or both, directions
- ◆ Automatic rapid return
- ◆ Simple to operate—No technical knowledge required
- ◆ Part programs can be entered by non-skilled operators. "Learn" mode part program entry
- ◆ Stores and wraps up to 1,000 part programs
- ◆ Pneumatic power chuck or power collets
- ◆ Electronic tension control system
- ◆ Accepts mandrels from .015 to 3.00 inches
- ◆ Full length support rollers
